**CASEA Graduate Student Representative AGM Report**

Respectfully submitted by: J. Alysha Sloane

**CASEA Grad Student Session**

The 2015 CASEA grad student session will focus on the challenges that infuse the construction of the relationships between theory and research methodologies. During the first half of the event, Dr. Wallin, Dr. Harris and Dr. Poole will discuss a recent research project and how their theories informed or created tensions within their method/ologies. During the second half of the session, each faculty member will facilitate a small discussion group that will focus on the students' theory/methodology questions.

Our sincere thanks go out to Dr. Dawn Wallin (University of Manitoba), Dr. Carol Harris (University of Victoria), and Dr. Wendy Poole (University of British Columbia) for agreeing to share some of their wisdom and experience in support of the 2015 CASEA grad student session.
